Overview of the Government Work Report of Zibo

On the morning of January 11, 2025, the Fifth Session of the Sixteenth People's Congress of Zibo City was officially opened. Mayor Zhao Qingwen delivered the government work report on behalf of the municipal government.

I. Review of Achievements in 2024.

Focusing on the '3510' development goals and the urban vision of 'a strong, wealthy, and beautiful city with a sound ecological environment,' the 'Three Enhancements and Three Pursuits' initiative was further advanced. Efforts were made to actively promote the construction of the 'Five Zibo' strategy by stabilizing growth, improving quality and efficiency, advancing reform, mitigating risks, and enhancing people's livelihoods. The economy and society maintained steady and healthy development, and substantial progress was made in building a socialist modern strong city in the new era.

The economic performance showed stabilization and improvement. Zibo's regional GDP is expected to exceed 480 billion yuan, meeting the targets established earlier in the year. General public budget revenue reached 41.14 billion yuan, an increase of 4.1% year-on-year.

Urban quality continued to improve. The Ancient Qi City in Linzi and the Zibo section of the Jiaozhi Railway were added to China's tentative list for World Cultural Heritage sites. The Zhoucun Ancient Commercial City became the city's first 5A-level scenic spot, and Hong Ye Shi Yan and Mata Lake National Wetland Park were rated as 4A-level scenic spots.

A series of investment promotion activities, such as the Zibo-Multinational Corporation Industrial Cooperation Dialogue, were held, and three new international friendly (cooperative) cities were added.

Public welfare and people's livelihood were firmly ensured. Zibo Vocational Institute achieved an important milestone in its upgrade to a undergraduate institution.

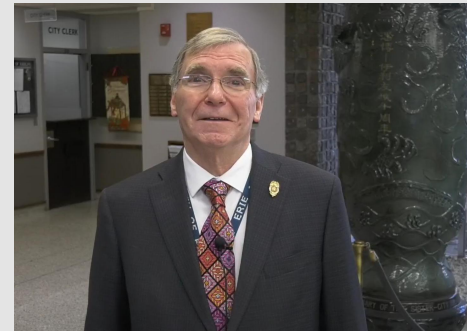

II. Goals and Key Tasks for Economic and Social Development in 2025

Key targets for Zibo's economic and social development in 2025 are as follows: Zibo's regional GDP growth rate of over 5%, general public budget revenue growth of over 2%, synchronizing resident income growth with economic growth, an urban surveyed unemployment rate controlled at around 5.5%, the creation of more than 55,000 new urban jobs, keeping consumer prices at a reasonable level, and achieving all energy-saving, carbon-reduction, and environmental quality improvement targets. Energy consumption intensity will be aligned with the provincial incentive targets.

Warm New Year's Greetings to Zibo from International Friends

As the Spring Festival approaches, the Zibo Foreign Affairs Office sincerely invites international sister cities and friends to send their greetings and best wishes to the citizens of Zibo through video messages. Though we may be miles apart, this friendship feels like sunlight, brightening Zibo's winter. May the New Year bring joy and happiness to Zibo and its international sister cities as we embrace a hopeful future together.

Biz Updates

Shandong N&M TECH Co., Ltd

Shandong N&M TECH Co., Ltd. is a high-tech enterprise specializing in the development, production, processing, and operation of glass and its derivative products. By leveraging technological patenting, standardization, and internationalization, the company has adopted lean production management, building a comprehensive and scientific modern system that drives robust development. The company's innovative antibacterial tempered glass project has passed results appraisal and scientific and technological novelty evaluation, both of which concluded it to be at an internationally advanced level. It has been honored with awards such as the Provincial Circular Economy Science and Technology Award, the Provincial Circular Economy Innovative Technology Excellence Award, the Provincial Energy Conservation and Environmental Protection Science and Technology Award, and the Provincial Circular Economy Standard Innovation Award.

PART 2 Biz Updates

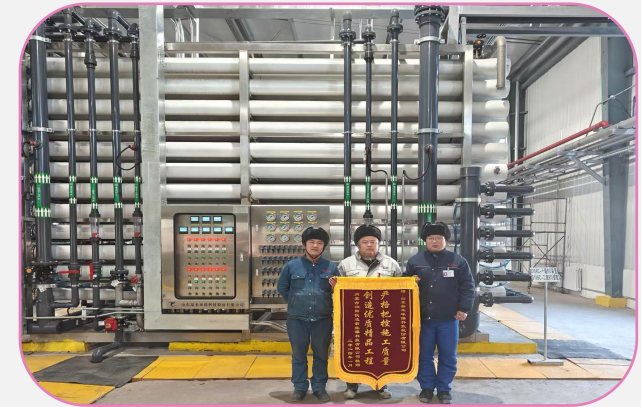

Adhering to a customer-centric service philosophy, Shandong N&M TECH Co., Ltd. continuously expands its business scope and improves the quality of its products and services. It is now an excellent supplier to internationally renowned companies such as Givenchy, Disney, and Joyoung. The company has also established strategic partnerships with numerous Fortune Global 500 enterprises. Its products are exported to more than ten countries and regions, including Europe, the Americas, Japan, South Korea, and Southeast Asia, earning high praise from both domestic and international customers.

Major Countries: Japan, United States, France,
United Kingdom, Germany, Italy

Shandong Taihe Environmental Protection Technology Co., Ltd.

Shandong Taihe Environmental Protection Technology Co., Ltd., established in 1998, is a high-tech enterprise specializing in the research and development of ceramic membrane materials and their application in water treatment. The company's short-process technology, centered on ceramic ultrafiltration membranes, has been recognized by the China Membrane Industry Association as being at an "internationally advanced" level. This innovative approach replaces sand filtration and organic ultrafiltration with a single ceramic ultrafiltration step, significantly shortening the process, reducing the required footprint, avoiding frequent replacement of organic membranes, and saving both investment and operating costs. Its main application areas include industrial water treatment, wastewater reuse, seawater desalination, and municipal water supply.

Shandong Taihe Environmental Protection Technology Co., Ltd.

The company's domestic clients include renowned enterprises such as ChemChina, China Coal Group, Shandong Energy Group, Yangquan Coal Group, and Zhejiang Juhua, as well as numerous other central enterprises and listed companies. Shandong Taihe has obtained over 30 authorized patents, undertaken several key R&D projects in Shandong Province, and participated in the formulation of multiple national and industry standards. Recognized as a "Gazelle Enterprise" in Shandong Province, the company was listed on the New Third Board in 2023.

Major Countries:

Indonesia, Vietnam, Singapore, Malaysia, United Arab Emirates, Saudi Arabia, Egypt, Morocco

Cooperation Methods:

- 1.Sales
- 2.Developing Overseas Agents
